

In an effort to better organize our growing training library we have renamed certain titles as well we have created more organized categories. If you have previously purchased our tapes, be sure you compare your titles to make sure you are not re-ordering the same ones (unless you are upgrading to DVD). Our DVD's were created to accommodate the overwhelming requests for our material using the DVD format. Picture quality varies since many of these transfers were made from the original analog VHS source. Our latest tapes are being filmed from a digital source. We trust that you will study the material for it's content and recognize the value in owning these important self-defense DVDs.
